FinanceMaster now integrated with InsureSign, simplifying signing process for premium-finance agreements

-- FinanceMaster user, FCF Premium Finance, shares how the e-signature integration is making life easier for insurance agencies and their clients --

(Feb. 05, 2016) – Advanced Insurance Systems, Inc. today announces its partnership and integration with the [InsureSign](#). Now insurance premium finance companies that use our FinanceMaster Premium Finance Software can offer agents and insureds a fully automated signing process that eliminates the tedious tasks of printing agreements for signing, and then faxing or mailing those documents for signing by the insured.

“Through our integration with InsureSign, we’ve now eliminated all manual intervention by the agent and the insured,” says Kristi Clark, with Advanced Insurance Systems, Inc. “Given that we generate thousands of web-based premium finance agreements every business day, we’re thrilled that our customers can now eliminate the process where each premium finance agreement must be printed and signed by the insurance agent and the insured.”

FinanceMaster user, FCF Premium Finance, is among the first to use InsureSign through the integration.

“Until recently, the agents still needed a physical signature for the financing portion of the process. Now our agents can send our documents the same way they send the policy information, making them more efficient,” says Jonathan Keller, managing partner with FCF Premium Finance.

“Prior to InsureSign, our clients would have to meet in person, mail, or fax our contract to the insured for a physical signature. After that they had to fax or scan and email the contract back to us for processing,” adds Keller. “As the world has shrunk, many of our agents do business outside of their state of residence. InsureSign has made this process easier by allowing them to quickly and efficiently get documents signed and processed.”

InsureSign, the only e-signature software designed to meet the specific needs of the insurance industry, is now used by more than 1,500 agencies across the world.

“Through our integration with FinanceMaster, we’re looking forward to helping premium finance companies simplify and speed up the signing process for finance agreements,” says Joe Floyd, president of InsureSign. “This integration means that all involved – from the finance

companies to the agencies to the insureds – can enjoy a signing process that can be completed from anywhere on any device in mere minutes. Done and done.”

About FinanceMaster

In 1984, our President incorporated Georgia Budget Service, a premium finance company. When the software that was purchased for Georgia Budget Service proved to be grossly inadequate, our President utilized his prior years of experience with Burroughs Corporation to develop replacement software. This venture ultimately led to the foundation of Advanced Insurance Systems, Inc., currently the largest premium finance software development company in the nation.

For more than thirty years, the staff of Advanced Insurance Systems, Inc. have provided assistance to over five hundred insurance companies, agencies, managing general agencies, and independent premium finance companies before, during, and long after they have established their premium finance companies.

In the future, Advanced Insurance Systems, Inc. and the FinanceMaster® Premium Finance Software System will continue to evolve in order to reflect the desires of its users, the pace of technology and the demands of a rapidly changing industry.
